

YOUSSEF OSAMA

SR. PRODUCT DESIGNER

(+20) 1149494325 • youssefosama3004@gmail.com • youssefkader.me • El Sheikh Zayed City, Giza, Egypt

PROFESSIONAL SUMMARY

Senior Product Designer with 6 years of experience across government, fintech, ecommerce, trade and logistics, associations, and agency work. Work covers discovery, product design strategy, design systems, high-fidelity UI, and developer handoff. Clients include DP World, Dubai Trade, PCFC, the American Association of Blacks in Energy, and multiple Egyptian ministries, alongside startups and agencies in the UAE, Saudi Arabia, the US, and Europe. Started out as a UI developer, so designs leave my hands accounting for what engineering has to build, which keeps the handoff short and the back and forth low.

CORE COMPETENCIES

Product Design

End to end product design • Design strategy • Information architecture • Interaction design • Prototyping

Design Systems

Component libraries • Tokens and variables • Variants and props • Documentation • Governance

Cross Functional Leadership

Stakeholder alignment • Design reviews • Developer handoff and design QA • Team direction

AI Tools

Claude • ChatGPT • Gemini • UX Pilot • Agentic workflows for research, design, and code • Prompt driven concept exploration and synthesis

UX Research and Discovery

User research • Usability testing • Journey mapping • Competitive analysis • Design thinking workshops

Enterprise and Government Platforms

Data heavy dashboards • Complex service workflows • Bilingual EN and AR with RTL • Compliance driven design

Tools and Technical

Figma • Framer • Adobe CS • HTML5, CSS3, Tailwind • Jira and ClickUp

PROFESSIONAL EXPERIENCE

Sr. Product Designer | egabi Solutions | Jan 2026 - Present | Remote, Egypt

Design Leadership

- Own the product design function end to end, defining the standards, workflows, and quality benchmarks used across every project.
- Set design strategy and hold final design decisions, turning business and stakeholder needs into solutions that scale.
- Act as the main design contact between stakeholders, engineering, and the design team, keeping scope and feasibility aligned.

Product Delivery

- Oversee delivery from discovery through implementation, covering usability, accessibility, and execution quality on complex systems.
- Lead design on the Ministry of Manpower Labor Services Digitalization Platform, including the company portal, service application flows, and the platform design foundations.

Design Systems and Standards

- Build and maintain component libraries, tokens, and documented patterns so government and enterprise products stay consistent across teams.
- Run design QA against the build to keep fidelity and accessibility intact between Figma and production.

Product Designer | egabi Solutions | Aug 2024 - Jan 2026 | Remote, Egypt

- Designed an operational dashboard for the Egyptian Meteorological Authority, restructuring how data is visualized so monitoring is faster to act on.
- Built dedicated applications for multiple Egyptian ministries, large scale government products delivered under strict compliance requirements.
- Delivered work for maritime and trade clients including DP World, Dubai Trade, and PCFC, matching the regulatory and brand standards of each entity.
- Turned unclear client requirements into functional interfaces that improved service delivery for government bodies.

Product Designer | Rocky Mountain Design Agency (RMDA) | Mar 2025 - Present | Remote, United States

- Provide product and UX direction to client businesses, from framing the problem through to UI execution.
- Contributed to the digital experience of the American Association of Blacks in Energy, working to the accessibility and content standards of a member facing organization.
- Direct a three person UX team across concurrent engagements, allocating work, reviewing output, and owning final quality.

- Run usability testing, journey optimization, and design thinking workshops as part of delivery.
- Tailor solutions to the scale and constraints of each client, favoring systems that stay maintainable after handoff.

Product Designer | Freelance | 2020 - Present | Remote

- Delivered product, web, and brand design for clients in Egypt, the UAE, Saudi Arabia, the UK, the US, Belgium, Canada, Kuwait, and Ukraine.
- Work covers SaaS product UI, dashboards, mobile apps, multilingual marketing sites, brand identity, and CMS builds.
- Built a referral driven client base through repeat engagements and long term relationships.

Product Designer and UI Developer | IT Cores | Aug 2023 - Aug 2024 | Remote, Saudi Arabia

- Redesigned and rebuilt three dashboard interfaces, improving usability and visual consistency, and shipped the front end code.
- Designed and developed two multilingual (EN and AR) websites and redesigned two mobile applications as the sole designer and developer.

EARLIER ROLES

Product Designer and UI Developer | Hyphen Group, Belgium | Jun 2021 - Jun 2022
